

MANISHA BAI NENAVATH

+91 7013584667 | manishanenavath7@gmail.com

PROFESSIONAL SUMMARY

Results-driven Computer Science and Engineering graduate with hands-on expertise in Data Structures and Algorithms, Object-Oriented Programming, and Full-Stack Web Development. Proficient in Java, Python, JavaScript, React.js, Node.js, Express.js, and SQL, with proven ability to design, build, and deploy scalable, database-driven web applications and RESTful APIs. Passionate about Software Engineering, Artificial Intelligence, and Generative AI, with strong problem-solving skills and a track record of delivering high-quality software in fast-paced, deadline-driven environments.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering	2022 - 2026
Ashoka Womens Engineering College, Kurnool CGPA: 8.5/10	
Intermediate (MPC)	2020 - 2022
A.P.T.W.R Junior College for Girls, Nandyal CGPA: 8.7/10	
Secondary School Certificate (SSC)	2015 - 2020
KGBV Bandi Atmakur, Nandyal CGPA: 9.8/10	

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, SQL
- Frontend Development:** HTML5, CSS3, Bootstrap, React.js, React Router, Responsive UI Design
- Backend Development:** Node.js, Express.js, RESTful API Design & Integration, JWT Authentication
- Databases:** MySQL, MongoDB
- Core Concepts:** Data Structures & Algorithms, OOP, DBMS
- Tools & Platforms:** Git, GitHub, VS Code

TRAINING

Full-Stack Development Trainee NxtWave CCBP 4.0 Academy	2024 - Present
- Pursuing intensive, industry-aligned training in HTML, CSS, JavaScript, React.js, Node.js, Express.js, SQL, MongoDB, and Python to build production-ready, full-stack web applications. - Solving 300+ Data Structures and Algorithms problems and building hands-on projects using industry-standard tools and best practices to strengthen coding efficiency and interview readiness.	

PROJECTS

Personalized Mental Health Advisor Using Generative AI

Architected an AI-powered mental health support platform that analyzes user responses to identify concerns and deliver personalized, empathetic coping guidance. Built machine learning models with Scikit-learn and Pandas, and integrated a TinyLlama-based Generative AI engine for non-diagnostic conversational support. Developed and deployed a Flask-based web application for real-time interaction and dynamic recommendations. Combined data-driven modeling with intuitive design for an accessible, engaging user experience.

Technologies: Python, Flask, Scikit-learn, Pandas, TinyLlama, Generative AI

Roles and Responsibilities:

- Developed an interactive mental health chatbot UI using HTML5, CSS3, and JavaScript for conversational user interaction.
- Developed the Flask backend to manage user requests, responses, session handling, and questionnaire workflow.
- Implemented REST API endpoints using Flask and integrated frontend-backend communication using the JavaScript Fetch API.
- Performed API testing, debugging, error handling, and end-to-end integration testing to ensure reliable application functionality.

Jobby App — Job Search Platform

Engineered a full-featured job search platform enabling users to explore job opportunities and access detailed listing information in real time. Implemented secure JWT-based authentication, authorization, protected routing, and persistent login sessions for a safe and seamless experience. Integrated REST APIs with optimized state management to power dynamic, up-to-date job listings across the platform. Designed responsive, reusable UI components with React.js, React Router, and Bootstrap to boost usability across devices.

Technologies: [React.js](#), [JavaScript](#), [CSS](#), [Bootstrap](#), [React Router](#), [REST APIs](#), [JWT Authentication](#), [Authorization](#), [Local Storage](#)

Roles and Responsibilities:

- Developed a responsive job portal application using React.js, implementing Login, Home, Jobs, Job Details, and Not Found routes.
- Implemented JWT-based authentication and protected routing to manage user access and secure authenticated routes.
- Integrated REST APIs for profile, job listings, and job details, with search, multi-filtering, loading, failure, retry, and empty-state handling.
- Implemented React Router, dynamic routing, reusable components, API integration, and responsive UI to deliver a complete job-search experience.

Nxt Watch — Video Streaming Application

Developed a YouTube-inspired video streaming platform featuring Trending, Gaming, Saved Videos, and Search functionalities for an engaging viewing experience. Implemented secure JWT-based authentication and protected routes to safeguard user sessions and content access. Consumed REST APIs to fetch, filter, and render dynamic video content across multiple categories in real time. Leveraged React.js state management and client-side routing to deliver a smooth, interactive, and responsive user experience.

Technologies: [React.js](#), [JavaScript](#), [CSS](#), [Bootstrap](#), [React Router](#), [REST APIs](#), [JWT Authentication](#), [Authorization](#), [Local Storage](#)

Roles and Responsibilities:

- Developed a responsive video streaming platform using React.js, implementing Home, Trending, Gaming, Saved Videos, Video Details, and Login routes.
- Implemented JWT authentication, protected routes, login validation, logout functionality, and conditional navigation using React Router.
- Integrated REST APIs for videos, trending content, gaming content, and video details, with search, loading, failure, retry, and empty-state handling.
- Implemented Like, Dislike, Save/Unsave, Light/Dark theme switching, dynamic routing, and video playback using React Player.

CERTIFICATIONS

- Industry-Ready Certification in Full-Stack Development — NxtWave Disruptive Technologies (Apr 2024 - Present)
- Elite NPTEL Certification in Digital Image Processing

ACHIEVEMENTS

- State-Level Volleyball Championship Winner — Represented the team at the state level and secured the championship title, demonstrating leadership, teamwork, discipline, and competitive excellence.
